EXTERIOR

Premium protection against harmful UV rays

The Sunshield Exterior range offers a selection of premium quality paints designed to provide long lasting protection against harmful UV rays.

Sunshield Exterior has a tough, flexible finish that gives outstanding protection against weathering, along with excellent resistance to mould and fungal growth. Available in a range of sheen levels that include matt, low sheen, semi gloss and gloss. Sunshield Exterior is suitable for use on all exterior surfaces including masonry, bricks, fibro cement and correctly primed timber and metals.

Easy to use and low VOC, Sunshield Exterior is an environmentally friendly paint coating that is an excellent choice to decorate the exterior of your home. It is available in a stylish choice of colours ranging from white and pastels to machine tinted and factory mixed traditional colours.
